EASY FLOW

A frictionless fintech integration designed exclusively for builders.

The Problem

Fintech onboarding shouldn't be a roadblock for developers.

High-Friction Environments

- **Painful Onboarding:** Connecting to developer platforms such as M-Pesa Daraja has historically been a painful and slow process for developers.
- **Complex Requirements:** The high requirements and friction just to obtain basic API keys for fintech solutions are overwhelming.
- **Stifled Innovation:** This exhausting barrier to entry actively discourages builders from creating new and innovative products.

Frustrated developer looking at code on a screen

The Solution

A bold, seamless plugin built for speed and security.

Introducing Easy Flow

Smooth Plugin

We provide a completely smooth fintech solution that allows developers to plug into payment networks effortlessly.

Zero API Keys

Our offering is bold. Easy Flow does not require any developer using our services to manage or rotate complex API keys.

Secure by Design

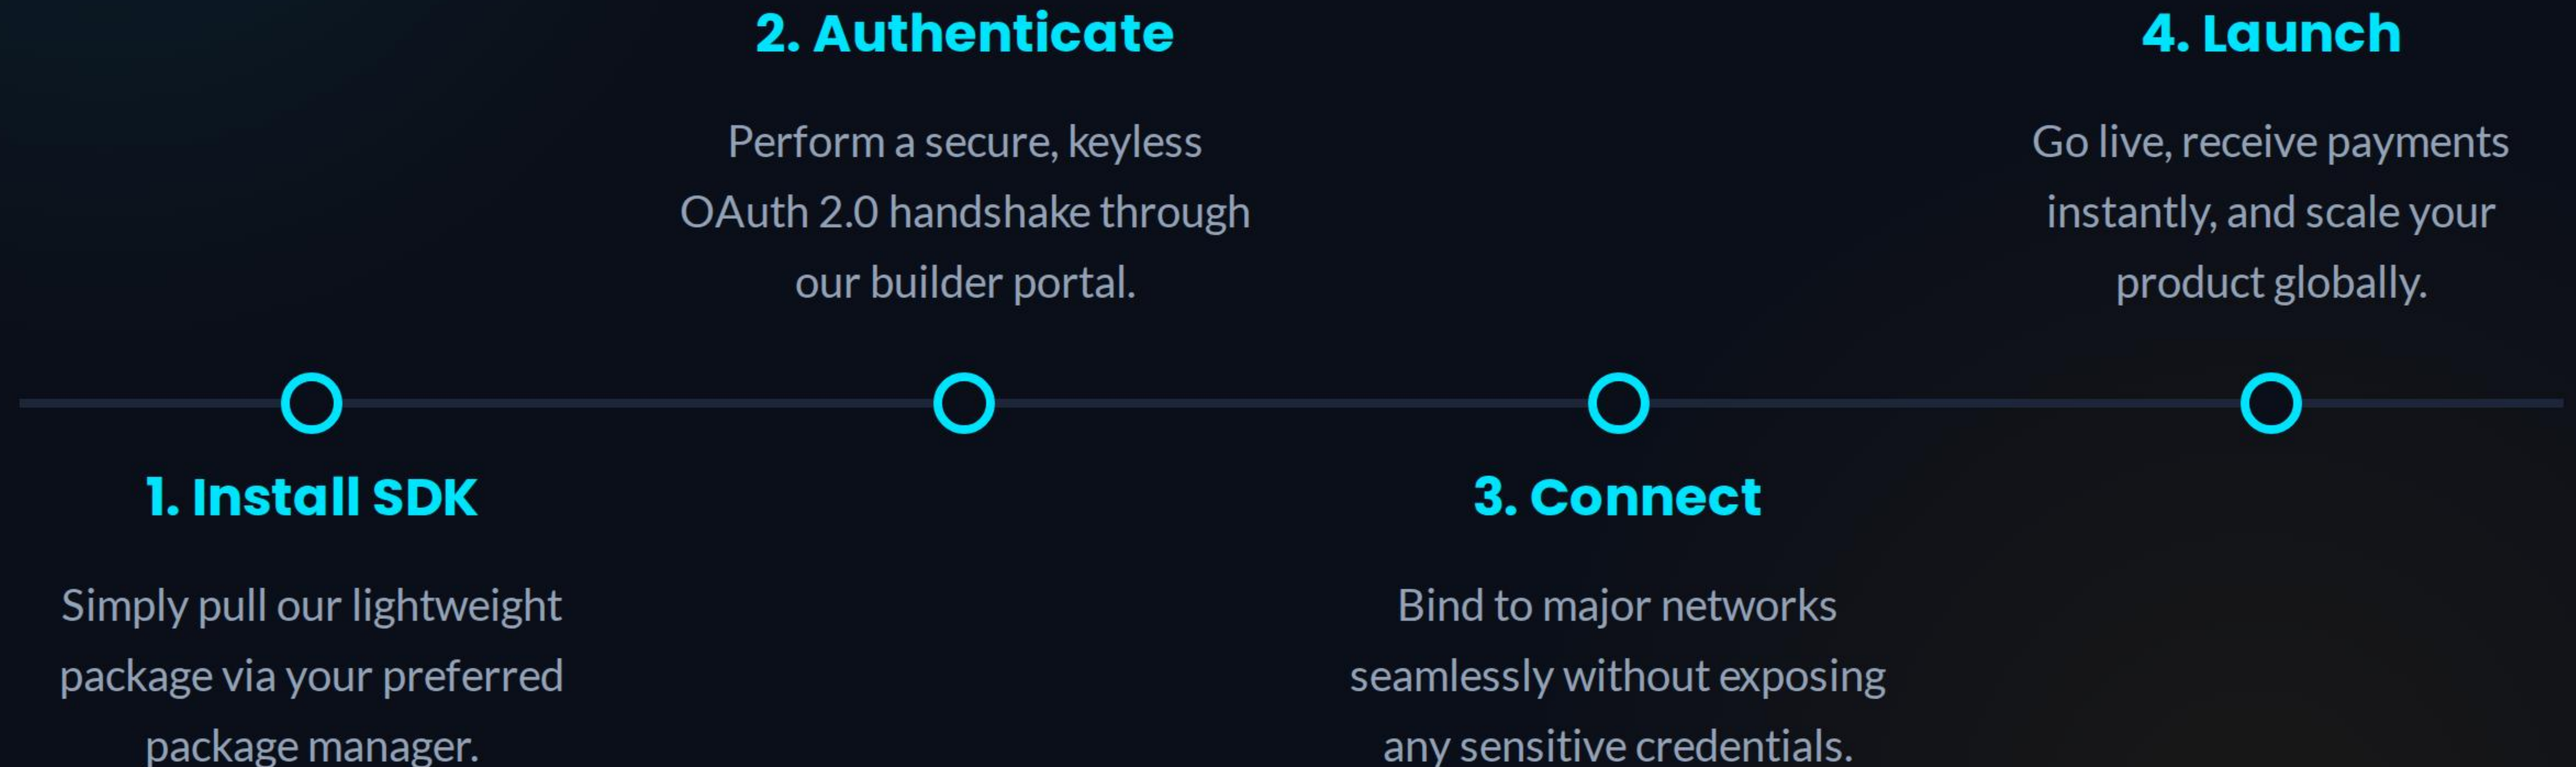

By removing keys, you never have to worry about accidentally deploying or leaking sensitive credentials to GitHub.

How It Works

From zero to fully integrated in under an hour.

Seamless Integration Process

The Market Opportunity

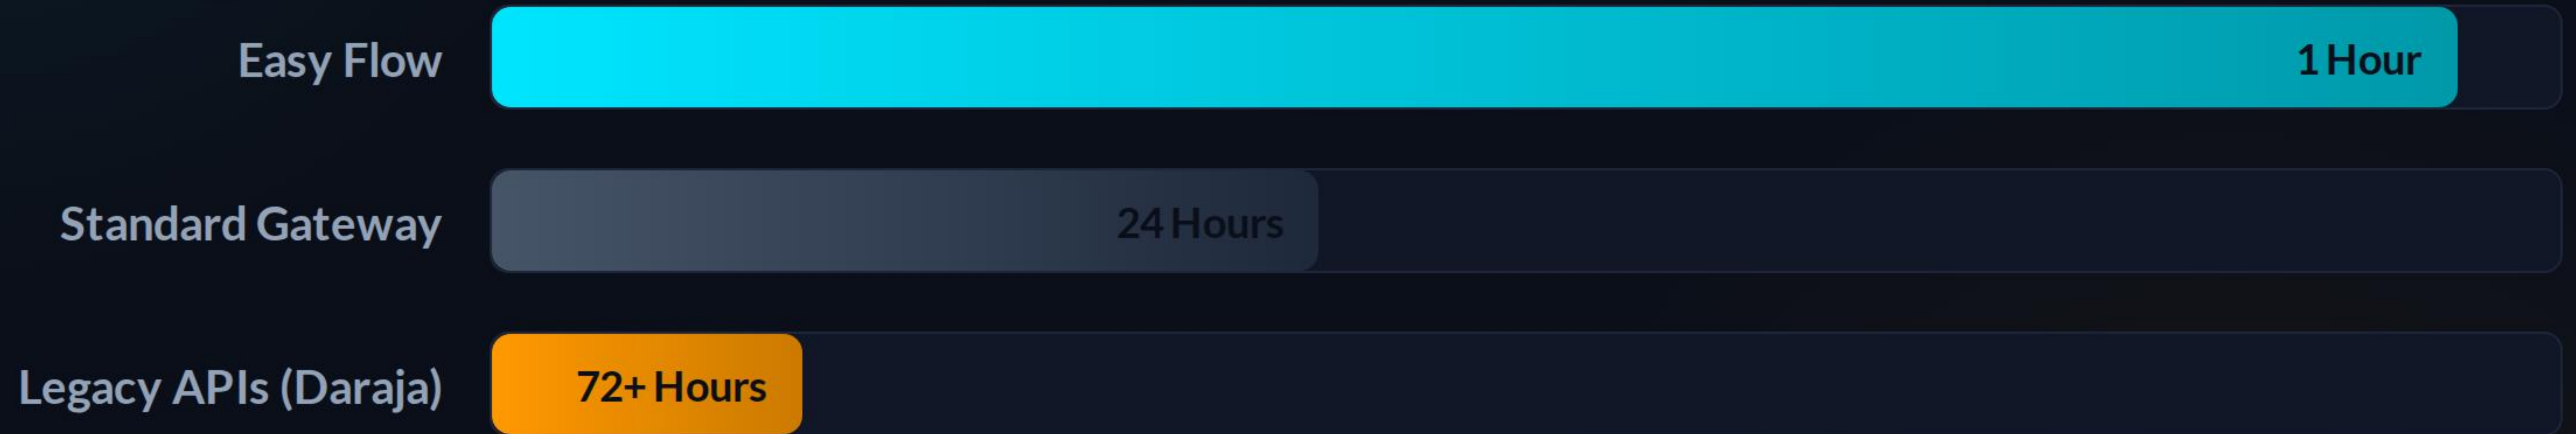

30M+

African Businesses Online

Massive Untapped Potential

The demand for digital payments in emerging markets is skyrocketing. By removing the friction of legacy APIs, Easy Flow unlocks immediate value for developers building the next generation of e-commerce, SaaS, and gig-economy platforms.

Time to First Transaction

Easy Flow reduces overall integration time drastically, allowing development teams to focus on core product features rather than wrestling with complex, outdated payment infrastructure.

Developer-First Pricing

Tier	Monthly Fee	Transaction Fee	Support Level
Sandbox / Dev	Free	0%	Community Docs
Startup	\$49 / mo	2.9% + 30¢	Priority Email
Enterprise	Custom	Volume Based	24/7 Dedicated Slack

Empowering Builders

Our Vision

Our mission is to democratize access to financial infrastructure. We believe that any developer with an idea should be able to accept payments globally without navigating bureaucratic hurdles.

By streamlining the integration process, we are supporting the next wave of innovation across the continent.

Ready to Build?

Join the future of developer-first fintech integration today.
